PROFILE

Full stack Web Developer and **Designer** with a proven track record of creating visually appealing and functional websites. Skilled in both front-end and back-end development with a keen eye for design and the ability to create engaging user interfaces that enhance the user experience.

SKILLS

Programming Fluency:	HTML, CSS, SCSS, JavaScript, PHP, MySQL, PostgreSQL, Python, MongoDB, C#
Technologies:	NodeJS, ReactJS, WordPress, Linux, Figma, Photoshop, Ghost, Jekyll, Gatsby, Shopify
Frameworks and Tools:	Laravel, NextJS, MVC, OOP, Composer, NPM, Git, RESTful APIs, Jquery

PROJECTS

Guess football: A personal project where I created an Android app using React Native featuring football themed fun and quiz games. I also built the backend and a web based game using Laravel. The app allows users to play, compete, and track their progress in realtime. (Visit website)(Visit Playstore)

AeonFree.com: AeonFree is my project to help people host their websites for free on the internet with free subdomain names. It has more than 200,000 registered users. (Visit here)

CIRA (Contextual Information Retrieval Assistant): CIRA is an AI Chatbot system that can be embedded into websites, I published it as a research paper, and won the best research paper award. It was developed using Laravel and Llama 3.1.

Subtract.site: Consists of over 3000+ free Math calculators, Text, Development, and Other Tools. (Visit here)

RecommendAnime.com: Designed and developed an anime and manga recommendation website using PHP, Laravel, and MySQL. (Visit here)

EXPERIENCE

Full Stack Developer   Feb 2025 – Present
Nepa Rudraksha   *Kathmandu, Nepal*

- Built and managed a Shopify-based eCommerce site used by thousands of customers daily.

- Worked with the UI/UX team to design clean, attractive pages for offers, festivals, and product launches.

- Helped the team hit a new sales record during a campaign with Ajay Devgn as the brand ambassador; sales grew by 140%.

- Worked on projects using Next.js and Laravel to build fast, responsive landing pages and backend for the company.

Full Stack Developer   Jul 2023 - Jan 2024
Remote-Work.io   *Upwork*

- Utilized my design and development skills to create an aesthetically pleasing and engaging landing page which led to increased client satisfaction and improved user engagement.

- Developed a landing page to effectively showcase the client's course project, resulting in clear communication of key features and benefits, driving potential users to explore the offering.

- Conducted thorough website maintenance and troubleshooting to ensure proper site functionality, with a focus on SEO improvements, leading to optimized performance and enhanced search engine visibility.

Full Stack Developer   Mar 2022 - Jun 2023
efootball.review   *Upwork*

- Designed and developed a website using NextJS and MongoDB to meet the client's needs and requirements, leading to a scalable and efficient web platform.
- Managed projects from start to finish, including timeline, budget, and deliverables, ensuring on-time delivery.

Software Engineering Intern Jun 2019 - Aug 2019

National Innovation Center *Kathmandu, Nepal*

- Contributed to developing a medical drone project to provide medical facilities to remote areas of Nepal, by developing a dashboard interface using HTML, CSS, and PHP, which ensured efficient monitoring of drones and streamlined data analysis for better operational management.
